

Microsoft Dynamics 365 CRM Technical Consultant / Application Developer

Job Title:

Microsoft Dynamics 365 (CRM) Technical Consultant / Application Developer

Location:

Milton Keynes - Flexible working options with a mix of home-based, client-site and head-office

Consultant Reporting to:

Technical Director

Salary:

£40k - £50k (Potentially Negotiable)

Introduction:

PragmatiQ Solutions are a Microsoft Dynamics 365 Partner who specialise in providing small-medium sized businesses with Microsoft Dynamics Solutions, IT Support and Managed Services. We are currently recruiting for an ambitious Technical Consultant / Application Developer to join our growing team and contribute to building a forward thinking, 'cloud first' culture, utilizing only the latest Microsoft technologies.

We manage every project with a joined-up approach between Sales and Delivery, which ensures there is no disconnect between what is being promised and what ends up being delivered. Our ethos that a project truly begins once the technology has been implemented, has ensured that we have seen rapid growth in 2018, which has continued into 2019 and we are now looking for individuals who buy into that ethos and want to join us on that journey.

Purpose & Objective:

The Dynamics 365 Technical Consultant / Application Developer will be responsible for implementing and extending Microsoft Dynamics 365 CRM software and advising on & delivering against best practices, to ensure its features are utilised to their fullest to gain maximum business value.

The role will see the Technical Consultant / Application Developer be involved with a variety of client projects, as well as working on the internal development of PragmatiQ Solutions' IP, which extends the current applications and supports a number of industries.

Key Responsibilities:

- Analyse the client's business, develop solid understanding of their technical objectives and perform client facing demos & proof of concepts
- Work closely with the project delivery and internal product team
- Planning and executing the implementation of CRM developments, providing regular progress updates to internal and external clients
- Assist with best practise throughout the system implementation
- Guide new clients on the integration and use of CRM by staying up-to-date with the latest functionality
- Guide and advise existing clients on new functionality and managing their upgrades

Knowledge and Expertise:

Essential

- Strong Microsoft Dynamics CRM product experience, ideally with CRM 2016 or Dynamics 365
- Have been involved in the delivery of Microsoft Dynamics CRM projects
- 3+ Years in .NET, C#, ASP.NET and JavaScript programming
- Proven experience in consulting on software products, business analysis and requirements gathering
- Proficiency in developing plug-in and workflow assemblies
- Experienced in developing .NET web services and web API applications
- Able to customise CRM forms, views, workflows, security roles, business rules, charts, and dashboards
- Knowledge of CRM usage in Browsers, Outlook, Tablet and Mobile Applications

Desirable

- Understanding of related technologies such as Microsoft SharePoint, CDS, Flow, PowerApps and PowerBI
- Microsoft certifications in Microsoft CRM 2015 and above
- Experience with Microsoft Azure PaaS (Components)

This is an exciting opportunity to join a highly regarded, professional Dynamics 365 Partner, in a team that is dedicated to making every client a great success. Regular training will be a part of the role and in addition you'll get a package including a competitive salary package, holidays and additional benefits. Based in bright, spacious, air-conditioned offices in central MK.
